YOU RUN YOUR BUSINESS, WE RUN YOUR TECHNOLOGY

IT SERVICES TO KEEP YOU IN BUSINESS

We understand that most small and medium-sized business owners did not go into business because they love the everyday routine of making sure their computer systems are efficiently operating. Lucky for you, we did. These are the areas you should allow us to manage so that you can start spending your days pursuing your passions, not your problems.

WHY CHOOSE US

It's time to recognize that your attention needs to be on your product, not on your infrastructure. As a leading provider of managed services, we provide the technology and expertise to ensure your business keeps running so you can focus on profitability, not problems. We are a trusted partner to dozens of organizations such as yours.

CAN WE ASSIST YOU?

Your business depends on technology, but your small or medium-sized business has different needs than a massive corporate entity with a dedicated IT team. Further, your IT needs may fluctuate daily. You can't justify a whole or even part-time permanent employee, but when you DO need support, you NEED it.

Downtime from a crashed network can devastate your productivity, costing your business time and money. Data loss due to hacking, a virus, a natural disaster, or theft can be even more detrimental. By partnering with a technology firm, you can focus on the aspects of your business that make you profitable instead of troubleshooting routine network issues, developing processes to disaster-proof your business, and deciding your next technology upgrade.

We have the resources to offer IT services such as fully outsourced network management arrangements, including cloud services, IP telephony, messaging and call center management, virtual private networks, managed firewalls, and monitoring of network servers, among other benefits. With our IT solutions and services, you get the IT support you need when needed without a hike in fixed payroll costs. Never worry again about what to do when your network crashes or how to put a data recovery solution into place. We're your on-call IT.

MENU OF SERVICE OPTIONS WE OFFER

We know that each enterprise IT is different, so we work with you to develop strategies tailored to your needs.

Our solutions include:

- Data BackUp & Recovery
- Managed Services and Support Help Desks
- Cloud Computing
- Hardware Solutions
- VoIP Solutions
- Vendor Management
- Email and Spam Protection

CLOUD COMPUTING

Let us figure out a way to increase your server's capacity or add capabilities on the fly without investing in new infrastructure, training new personnel, or licensing new software. We will act like an extension of your team. Consider us additional subject matter experts to supplement your existing team.

PROTECTING YOUR CLIENTS

We have all read about massive data security breaches nationwide in recent news. You need an experienced security expert to protect your data. We customize and scale our services to avoid any possible data breach. Partnering with us ensures your system is always safe so you can focus on your business.

WEATHERING THE STORM

Enable enterprise-wide disaster recovery of backup. Recover quickly and avoid downtime. Learn how you can set up your disaster recovery solutions with our services. We offer efficient, effective and affordable solutions.
